

EMPLEX

BAG SEALING SOLUTIONS

MPS 7100 Series Continuous Band Sealer

The MPS 7100 series are stand alone bag sealers capable of sealing bags up to 2 pounds in weight (on an 8" wide bag, 2 mil bag) without the use of a conveyor. These sealers can seal bags up to 12 mil in thickness at production rates (6 mil maximum when gusseted). These sealers are also ideal for when the speed of an MPS 6000 series machine is not enough to meet your manufacturing needs. Designed for 24/7 operation, these sealers are suitable for all production environments.

- ◆ Dimensions: 69" tall x 64" long x 33" deep.
- ◆ Sealing Section: 10" of heating with 2 separate PID autotune temperature controllers. 10" of cooling via overhead cooling fans.
- ◆ Variable Speed up to 750 inches per minute.
- ◆ Seal Range: 16" - 45" from ground.
- ◆ Sealing Width: 1/4 standard.
- ◆ Electrical: 120 volt, 9 amps.
- ◆ Sealer Operation: Vertical or Horizontal.

Model

Configuration

MPS 7100

Standard Sealer

MPS 7110

Standard Sealer with Front End Trimmer

MPS 7120

Standard Sealer with Emboss Coder

MPS 7130

Standard Sealer with Dry Ink Printer

MPS 7150

Standard Sealer with Front End Trimmer & Dry Ink Printer

MPS 7160

Standard Sealer with Front End Trimmer & Emboss Coder
